

# Take control of food spend with enterprise-grade visibility and reporting

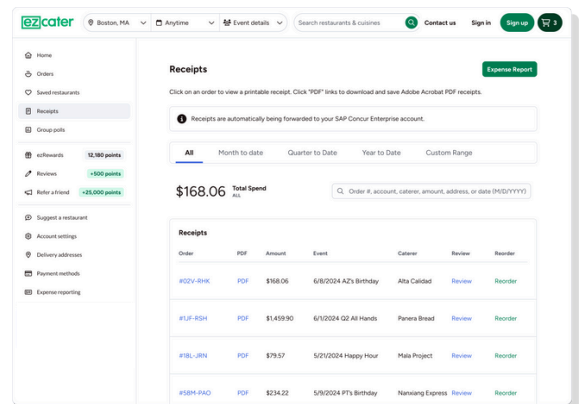

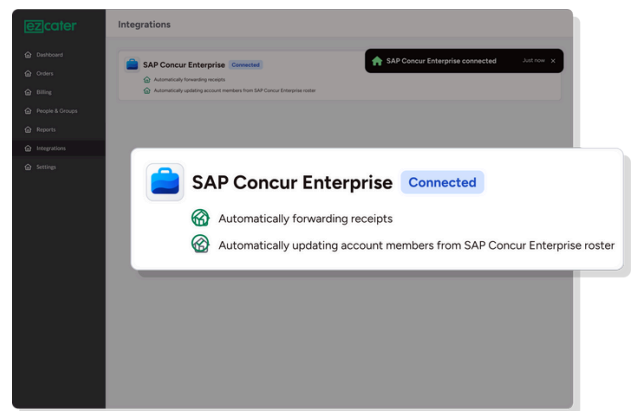

SAP Concur Partner

In Partnership With  
**ezcater**

ezCater Enterprise with SAP Concur allows you to automatically sync your organization's employees and workplace food expenses, connecting everyone for seamless receipt management and streamlined compliance.

With ezCater Enterprise, you'll get access to organization-wide visibility and control — along with unified expense reporting and receipt management, ensuring every order is compliant with company policies and fully accounted for. When employees order meals, expenses and spend policies are automatically enforced — no need to chase receipts or enter billing codes.

- **Keep access current and secure — without extra admin work:** With automatic roster syncing, new users receive instant invites to ezCater and departing employees are promptly deactivated, ensuring everyone's access stays up to date.
- **Organization-wide enablement in just a few clicks:** Admins can activate SAP Concur for the entire company in a single step, delivering seamless onboarding and immediate receipt integration for all employees — no individual setup required. **Note: Roster Sync is not currently available for accounts with a parent-child structure**
- **Effortless Receipt Management:** Food order receipts from every employee are automatically sent to SAP Concur, making compliance and reimbursement quick and easy across your whole organization.
- **Get unified spending and audit visibility:** Finance teams get a clear and complete view of food orders and expenses matched in SAP Concur — simplifying reconciliation, audit readiness, and informed budgeting.
- **Easy reimbursement for employees:** Employees receive automatic reimbursement for food orders, with their receipts automatically posted right to SAP Concur— all without receipt forwarding and manual setup
